TRC **FLEECE** BACKED EPDM

...IS A 2.6MM ROOFING SOLUTION COMPRISING A 1.2MM TECHNO EPDM MEMBRANE VULCANISED TO A HEAVY DUTY, TOUGH, 300 GM POLYPROPYLENE FLEECE BACKING.

...FULLY ADHERES TO TIMBER SUBSTRATE WITH A SPECIALLY FORMULATED WATER-BASED ADHESIVE, AND TO ANY OTHER SUBSTRATE WITH A SPRAY-APPLIED CONTACT ADHESIVE.

The membrane is available in roll widths of 1.52m and 3.05m, which are 15.25m long. A 75mm splice tape is pre-installed along one long edge.

✓ TECHNOLOGICALLY ADVANCED

Some fleece backed products just use glue to join fleece and membrane together, but TRC Fleece Backed EPDM adheres the two during the production process by using state-of-the-art technology and vulcanisation.

✓ COVERS IMPERFECTIONS

Perfect for an uneven substrate or overlaying an existing roof where suitable.

✓ SAVES TIME & MONEY

Stripping off an existing felt or fibreglass roof and disposing of it is both time-consuming and expensive: instead, simply overlay directly with TRC Fleece Backed EPDM.

✓ LONGEVITY

Elasticity and elongation allow the membrane to move with the building. The membrane has a 50 year life expectancy and 25 year warranty.

✓ SAFE & CERTIFIED

No hot works required when laying the membrane. TRC Fleece Backed EPDM has BROOF(t4) fire rating.

✓ COMPREHENSIVE SYSTEM

TRC Fleece Backed EPDM is part of the full range of TRC adhesives, primers, trims and accessories.

✓ REDUCED WASTE

Roll widths of 1.52m and 3.05m can be combined to best suit the roof size.

1.52M X 15.25M

CODE: TF0451.5M
23.18m², 51.52 kg per roll

3.05M X 15.25M

CODE: TF0453M
46.51m², 103.35 kg per roll
